CGPA-9.70

PERSONAL PROJECTS

An Effective Disease Detection System in Irregular Intensity Images Using Modified Logistic Regression Algorithm -- (Role: Team Leader)

- In Indian society medicinal plants are used numerous areas. Ayurvedic, Unani, Siddha, and homeopathy also used in some pharmaceutical companies which are based on plants. Ayurvedic medicine is entirely based on the use of medicinal plants. Compared to other medicinal methods, Ayurvedic medicine has no side effects, the cost of treatment is also very low, and this medicine is available for most ailments.

Stress Detection project Using Machine learning

- The dataset I'm utilizing for this errand contains information presented on subreddits related on emotional wellness. This dataset contains different emotional well-being issues shared by individuals about their life. People often share their feelings on social media platforms. Many organizations can use stress detection to find which social media users are stressed to help them quickly.
